

Vidiom Systems, Inc. Demonstrates OCAP™ Technology Solutions at the NCTA 2006 National Show

Broomfield, CO – April 5, 2006 – Vidiom Systems, Inc., a leading provider of technology solutions to the cable and consumer electronics industries, today announced they will be demonstrating OCAP Program Guides from Aptiv Digital, Digeo, Time Warner Cable, and TV Guide along with iTV applications featuring CSTV, MTV, The Weather Channel, and Zodiac Gaming. These applications will be operating on several OCAP-compatible platforms from Broadcom, Scientific Atlanta, and ADB at the NCTA 2006 National Show this week.

“Showing multiple OCAP platforms running OCAP applications from multiple vendors demonstrates the true versatility and potential of OCAP,” said Timothy R. Wahlers, CEO of Vidiom Systems.

“Interactive applications are the key to the success of OCAP. They are the fuel that energizes the engine and OCAP is the new engine. The promise of OCAP is that creative minds can create an application once and it can be deployed across any OCAP enabled cable system. Now we can develop a broad range of personalized interactive applications and services which create new revenue opportunities for the MSOs, the programmers and content holders alike,” said David McElhatten, Vice President of Business Development, Interactive Applications at Vidiom Systems.

Vidiom Systems will also be demonstrating a complete line of OCAP products and services solutions at the NCTA National Show in booth #3965 at the Georgia World Congress Center in Atlanta.
