## **Vidiom Systems, Inc. Builds OCAP™ Device and Application Test Lab**

**Broomfield, CO – April 10, 2006** – Vidiom Systems, Inc., a leading provider of technology solutions to the cable and consumer electronics industries, today announced it is building an OCAP Test Laboratory. The test lab will provide a range of OCAP device and application testing services for CE manufacturers and application developers. Today Vidiom can provide critical pre-certification and post-certification services for OCAP device manufacturers using Vidiom’s vCert Automated Test System, analyze test results, and provide certification process assistance. As services and facilities come online, the Vidiom Test Lab will also provide clients access to secure lab space and OCAP-compliant networks, application testing services on multiple devices and networks, and test suite development services.

“2006 will be the year of OCAP deployment. And with deployment comes testing. The Vidiom Test Lab will provide a crucial link in the development to deployment chain,” said Timothy R. Wahlers, President and CEO of Vidiom Systems. “Our test lab will provide the most comprehensive set of OCAP device and application tests available today. We look forward to working closely with MSOs, CE manufacturers, and application developers to ensure we continue to provide the right level and mix of services to ensure that OCAP is a success.”

OCAP is part of the OpenCable initiative created by CableLabs and has been adopted as a standard by the SCTE and other standards organizations. The goals of the OpenCable initiative are to provide a unified, open standard that allows programmers to deploy interactive services over multiple cable networks, enable supplier competition, and create a retail market for digital cable receivers.

For more information on the Vidiom OCAP Test Lab and all of Vidiom’s products and services visit us at the NCTA 2006 National Show in Atlanta April 9-11 at booth # 3965 at the Georgia World Congress Center.

## **About Vidiom Systems, Inc.**

Vidiom Systems, Inc. is an established leader in providing innovative iTV solutions. Our expertise includes software design and engineering, network migration, integration and deployment, application development, technical documentation, testing, and technical training. Vidiom is the leading provider of OCAP solutions to the cable and consumer electronics industries and has been involved in every stage of the evolution of OCAP—from assisting in the design and development of the specification, to building the OCAP implementation for the OCAP Development, LLC, to designing and building the first application development and testing tools. Founded in 1996, Vidiom Systems is headquartered in Broomfield, Colorado, and has additional engineering offices in Portland, Oregon and Des Moines, Iowa. Vidiom Systems is a member of the ADB Group of companies ([www.adbholdings.com](http://www.adbholdings.com)).
