

## **Vidiom Systems, Inc. Demonstrates vCert™ Automated Test System for OCAP™ Device Pre-Certification at NCTA 2006 National Show**

**Broomfield, CO – April 10, 2006** – Vidiom Systems, Inc., a leading provider of technology solutions to the cable and consumer electronics industries, today announced it will be demonstrating vCert™, a powerful Automated Test System for OCAP devices at the NCTA 2006 National Show this week in Atlanta.

“vCert gives manufacturers the ability to test and debug their OCAP set-top boxes and TVs and provides MSOs a way to qualify devices prior to placing them on their networks,” said Walden Miller, Vice President of Engineering Services for Vidiom Systems.

vCert is an integrated, turn-key system that includes hardware, software, and documentation required to test an OCAP device. vCert is based on the CableLabs® OCAP certification ATE and runs all of the CableLabs OCAP certification tests (the CTP). Vidiom has also developed an additional 4,000 tests to complement the CTP. Vidiom provides on-site, professional installation and training services as part of its vCert offering. vCert 1.0 version will be available in Q2, 2006.

Vidiom’s vCert 1.0 Automated Test System includes a Graphic User Interface that allows users to:

- ◆ Test multiple OCAP devices with a single test run
- ◆ Store test results for one or more OCAP devices in a database
- ◆ Create test sets within the CTP
- ◆ Examine test code and results
- ◆ Save and print test results in a format accessible outside of vCert

For more information on Vidiom’s vCert Automated Test System and the rest of Vidiom’s products and services visit us at the NCTA 2006 National Show in Atlanta April 9-11 at booth # 3965 at the Georgia World Congress Center.

## **About Vidiom Systems**

Vidiom Systems, Inc. is an established leader in providing innovative iTV solutions. Our expertise includes software design and engineering, network migration, integration and deployment, application development, technical documentation, testing, and technical training. Vidiom is the leading provider of OCAP solutions to the cable and consumer electronics industries and has been involved in every stage of the evolution of OCAP—from assisting in the design and development of the specification, to building the OCAP implementation for the OCAP Development, LLC, to designing and building the first application development and testing tools. Founded in 1996, Vidiom Systems is headquartered in Broomfield, Colorado, and has additional engineering offices in Portland, Oregon, and Des Moines, Iowa. Vidiom Systems is a member of the ADB Group of companies ([www.adbholdings.com](http://www.adbholdings.com)).
